

ELECTRONIC CONVERTING SERVICES

Ellsworth Adhesives is a global solutions provider for the electronics industry. With the number of electronic devices used daily, Ellsworth Adhesives works with manufacturers to ensure that devices are built and functioning at maximum performance. We provide the precision die-cut parts vital to the success of the finished products. Ellsworth Adhesives is equipped to convert materials such as thermal interface materials, EMI/RFI Shielding, insulators, moisture indicators, and more from industry-leading suppliers.

Ellsworth Adhesives will provide engineering support from the beginning concept to development builds to the final production of your product.

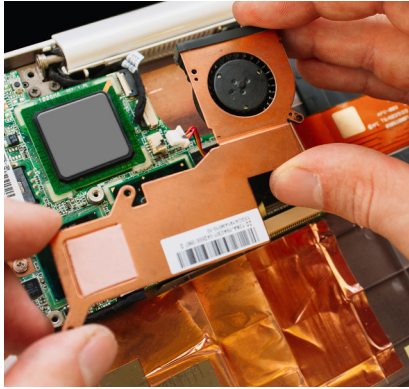

Converting Capabilities

Rotary Die Cutting • Rapid Prototyping • Laminating • Slitting
Flatbed Die Cutting • Laser Cutting • Plotter Cutting • Spooling

CONVERTING SERVICES

Applications:

- Bonding & Attaching
- Conductive Adhesives & Films
- Electrical Insulation
- EMI/RFI Shielding
- Insulators
- Moisture Indicators
- Sealing/Gasketing
- Sound & Vibration Damping
- Speaker & Microphone Filters
- Thermal Management

Materials:

- Acoustic Mesh & Membranes
- Adhesives & Tapes
- Conductive Tapes
- Copper & Aluminum Foils
- Double Coated Tapes
- Filter Fabrics
- Polypropylene Insulators
- Silicones
- Sponges & Foams
- Thermal Pads
- Urethanes

WE ARE ELLSWORTH ADHESIVES

With 80+ experienced Engineering Sales Representatives in North America and 200+ globally, Ellsworth Adhesives provides solutions for converting services.
